

1. Related to project
 - a. What is the purpose of the application?
 - b. What problem does it aim to solve?
 - c. Who are the primary users (e.g., employees, customers, general public)?
2. Functional Requirements
 - a. What are the core features you want in the application? (e.g., login, data entry, reporting)
 - b. Are there any special modules or tools the app must include?
 - c. Do you need role-based access control (e.g., admin, user, guest)?
3. Platform and Tech Preference
 - a. Do you have any preferences for the **technology stack** (e.g., .NET, Python, Javascript stack)?
4. Data Handling
 - a. What type of data will the app handle?
 - b. Should the app connect to a **database**? If yes, do you have one in mind (e.g., MySQL, PostgreSQL, SQLite)?
 - c. Do you need **data import/export** features (Excel, CSV, PDF)?
5. Integration & External Services
 - a. Will the application need to integrate with any external systems or APIs?
 - b. Should it send emails, generate reports, or handle notifications?
6. Timeline & Budget
 - a. What is your **expected timeline** for this project?
 - b. Do you have a **budget range** in mind?
7. Reference & Design
 - a. Do you have any **reference apps or screenshots**?
 - b. Do you have a preferred **UI/UX design** or should I suggest one?
